

HotSoft[®] 8

The Complete Property Management System

HotSoft 8 Cloud Solution

With the new Cloud Solution you access HotSoft 8 via secure channels over internet. The HotSoft 8 software and all your data is hosted, run and accessed remotely from a server at Hoist Cloud Service.

- ▶ Access HotSoft 8 via secure channels over internet.
- ▶ Robust, high profile and secure infrastructure with backup and recovery.
- ▶ No initial investment in hardware or software required.
- ▶ Purchase HotSoft 8 Cloud Solution for a monthly fee.

As a **Microsoft certified partner**, HotSoft 8 is able to offer clear benefits in terms of Windows compatibility and integration while providing an inside track to future technologies and architectures.

Focusing on Your Operation

HotSoft 8 is a versatile and complete property management system suitable for all kinds of hospitality facilities – from hostels to large scale hotel chains. With its fully integrable modular design we can scale HotSoft 8 to suit your business requirements.

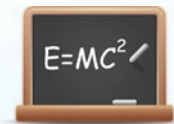

Windows 7 Look & Feel

HotSoft 8's complete Windows 7 look and feel makes it feel familiar and easy to navigate around. By customising the interface design with your hotel logo and colours it can blend in with your hotel's profile.

Integration with Central Reservation Systems

This allows you to sell rooms both via GDS and via your website. The reservations are registered with full information directly in HotSoft 8 and available rooms are automatically up for sale again.

Smart Software

The pro-active incorporated monitoring software monitors if interfaces are running and notifies you if there are any problems.

Interfaces for Third Party Integration

HotSoft 8 is open for integration with over 300 third party systems, among them the most common financial systems, credit card systems, key-card systems and restaurant systems.

Floating Windows Technology

The Floating Windows Technology allows you to have several windows open, active and visible on the screen at the same time. This provides an overview during planning, scheduling tasks and overall multi-tasking.

Easy Navigation

The navigation can be keyboard driven which means that you can switch between active windows and their functions with simple commands on the keyboard.

Scalable for Your Needs

HotSoft 8 is available in four editions catering for different operations within the hospitality industry. Since HotSoft 8 is a modular system it is always possible to upgrade your edition with new modules and functionality at anytime.

Standard Edition

The HotSoft 8 Standard Edition is suitable for small hotels, youth hostels and camp sites. It handles reservations, customer data, finances, bed booking and camp site booking. The standard edition is for the small scale business that needs an affordable, stable and functional property management system.

Business Edition

The HotSoft 8 Business Edition is suitable for small hotels with conference facilities. It handles reservations, customer data and finances and contains all the features you need to successfully run a conference facility.

Business+ Edition

The HotSoft 8 Business+ Edition is suitable for medium and large hotels with or without conference or spa facilities. It handles reservations, customer data and finances and has a number of extra functionality to help you run your business successfully.

Enterprise Edition

The HotSoft 8 Enterprise Edition is suitable for hotel groups and hotel chains. It handles reservations, customer data, finances and allows you to cross sell properties – always to the right price. It has a joint customer database and gives group statistics and reports. This is the complete and fully equipped version of HotSoft 8.

Edition Guide

	HS STANDARD	HS BUSINESS	HS BUSINESS+	HS ENTERPRISE
<p>Front Office</p> <p>Handles reservations, customer data and finances. Features bed booking and camp site bookings.</p>	●	●	●	●
<p>Conference</p> <p>Plan and book venues for events and handle payment of conference packages.</p>		●	●	●
<p>Spa & Leisure</p> <p>Schedule and perform advanced bookings of spa treatments. Well suited when several parameters are present in each booking: location, coordinator and type of treatment.</p>			●	●
<p>Customer Relationship Management</p> <p>Turn your invaluable customer data into a powerful marketing tool. This CRM tool helps you create new customer relations and develop existing ones.</p>			●	●
<p>Property Owner</p> <p>Simplifies the management of shared ownership by managing commission calculations for third party villa or apartment owners. Displays sales statistics and creates reports for statistical and auditing purposes.</p>			●	●
<p>Allotment</p> <p>Provides an overview of booking agreements with your partners and manages your allocated room nights for your travel agencies.</p>			●	●
<p>Multi-Property Management</p> <p>Allows shared management of reservations, finances, price rates and customer data for several connected properties. Provides group statistics and group reports.</p>				●
<p>Interfaces for Third Party Integration</p> <p>The interfaces for integration with over 300 third party systems helps to streamline and simplify your operations.</p>	●	●	●	●
